## AgVantage Testimonial

When I think of my experience with AgVantage I think of my grandfather. One might think of this as a strange association, but really it is not. My grandfather was born in the 1800's and died in the 1900's at the grand age of 93. My grandfather and his generation saw us go from horse and buggy to man on the moon. He saw more technological advancement than probably any other generation will ever see.

Well, when we joined the AgVantage team in April 2009 we went from a "horse and buggy" system to a "man on the moon" system. When Chuck and Theresa came out for the demo I kept asking them, "Can you do ..." and their answer was always "Yes, we can". When they finished the demo they told me, "Think about it and ...". I told them "Where do I sign?" When Mike and Val came out for the training it was déjà vu all over again.

What about the cost? Prudent purchases are not so much about total dollars but the "value" of the purchase. The ole "Bang for the Buck". Well, I spent last New Year's Eve with my wife – for the first time in twenty one years. Now, that is priceless!
